

ROUNDABOUTS | OVERSIZE VEHICLES

AMERICAN LEGION RD & SCOTT BOULEVARD ROUNDABOUT

Roundabouts are designed to accommodate vehicles of all sizes.

The roundabout at American Legion Road and Scott Boulevard is designed with a truck apron, a raised section of pavement around the central island that acts as an extra lane for large vehicles when required. The back wheels of the oversize vehicle can ride up on the truck apron so the truck can easily complete the turn, while the raised portion of concrete discourages use by smaller vehicles.

The images to the left show typical large truck movements within the roundabout at American Legion Road and Scott Boulevard. Note how the trucks use the truck apron to complete their turn in a roundabout.
