CAPITAL PROJECT FUNDS

Fund Summary Summary by Division Summary by Funding Source Project Summary by Name Unfunded Projects

CAPITAL IMPROVEMENT PROJECTS FUND

The Capital Improvement Projects fund accounts for the collection and disbursement of funds related to capital improvements or significant capital equipment.

The capital projects involve construction, purchase, or renovation of city facilities or property. They are generally non-recurring major improvements to the City's physical plant which necessitate long-term financing and are permanent in nature. The funding sources for these projects are generally not from operating funds but are instead from bond proceeds, grants, donations, or other one-time sources of income.

The City annually updates and issues a five-year capital improvement program. This program is the planning guide for the City's issuance of general obligation bonded debt and for the construction and replacement of the City's buildings and infrastructure. The City's total five-year capital improvement program is \$321,378,147. The upcoming year of the plan is integrated into the City's adopted budget. The adopted capital improvement fund expenditure budget for fiscal year 2014 is \$48,383,101.

Fund balance in the Capital Improvement Projects fund typically represents unspent bond proceeds. This fluctuates based on the timing of the issuance of the bonds and the timing of the project expenditures. The estimated ending fund balance for fiscal year 2014 is \$2,561,151.
